	Come along in this exciting animation workshop, where students will create short animation clips using LEGO bricks and compile them in a mobile app that is used by professionals. The program will approach topics like timing, set design, storyboarding, visual storytelling, camera angles and other animation fundamentals.	Put on your director's vest and make a film! In this program, students come up with a simple script to then be placed over a short film, scripted, shot and edited entirely by them. The program will approach film making and editing fundamentals such as- script & screenplay writing, storyboarding, camera angles, photography, lighting, sound design and much more.
